

2025 Green Bond Allocation Update

General Motors has reallocated all proceeds from its inaugural Green Bond, originally designated for both Factory ZERO and Orion Assembly projects, to exclusively Factory ZERO in Detroit-Hamtramck, Michigan.

This adjustment reflects GM's strategic business realignment to meet evolving market demand and optimize production capacity. Electric vehicle production at Factory ZERO continues to serve as GM's dedicated EV assembly facility for the Chevrolet Silverado EV, GMC Sierra EV, Cadillac ESCALADE IQ, and GMC HUMMER EV. The reallocation is not expected to impact GM's overall commitment of the Green Bond to Clean Transportation initiatives.
